

Climate and Environmental Policy of Shandong Linglong Tyre Co., Ltd.

Shandong Linglong Tyre Co., Ltd. (hereinafter referred to as "Linglong Tire" or "Company") has always maintained a high level of attention to the climate environment, actively implemented national strategies, and set basic action goals of achieving "carbon peak" by 2030 and "carbon neutrality" by 2050, committed to effectively managing and responding to climate change risks in the Company's operation process, undertook the responsibility of building a harmonious and beautiful earth ecological environment between humans and nature.

Applicability of environmental policy:

This Environmental Management Policy applies to all employees, contractors, suppliers, products and services of Linglong Tire, including production, manufacturing, research and development, sales, logistics.

Linglong Tire's action course of environmental policy:

Linglong Tire establishes a top-down sustainable development governance structure, is responsible for the environment, actively assumes the responsibility of protecting the environment, timely stops the behavior that will endanger the health, safety and environment, and actively implements the Company's climate and environmental policy in the following aspects:

1. Comply with Chinese/international or regional rules and laws.

Linglong Tire will continue to comply with the international rules for the protection of the earth's climate environment, and comply with the laws, regulations and relevant requirements of China and the countries where it operates and other applicable countries or regions.

2. Reduce the environmental impact in the production process.

Purchase a greater proportion of sustainable natural rubber, strive to protect forest resources in the country of origin, and protect the rights of indigenous people.

Improve energy efficiency, increase the proportion of renewable energy use, and reduce energy consumption.

Do a good job in the prevention and treatment of waste gas, control the emissions of gases that affect the climate, and prevent the pollution of the climate environment. Adhere to prudent water use, strive to reduce the consumption of water resources and the adverse impact of water intake and drainage on surrounding areas, and promote safe water use.

3. Reduce the environmental impact of the product at the use stage.

Continue to strengthen the research and development and application of green technologies, and develop more low-carbon technologies and products. Increase the proportion of recoverable and recyclable environmentally friendly materials in production. Increase the development and promotion of environmental protection products.

4. Promote resource recycling and utilization at the end of product life.

Linglong Tire actively advocates environmental protection:

1. Strive to communicate with all employees and stakeholders around the world and regularly disclose information related to the environment, such as Sustainability Report, progress and performance of environmental activities, etc.
2. Cultivate environmental awareness among all managers and employees.
3. Communicate the latest climate change policies to employees, suppliers, partners and other stakeholders, encourage them to reduce carbon emissions in their daily business and life, and promote environmental protection policies through collaboration with external partners.
