

Quality Policy and Product Safety Statement of Shandong Linglong Tyre Co., Ltd.

Shandong Linglong Tyre Co., Ltd. (hereinafter referred to as "Linglong Tire" or "Company"), as a responsible tire company, sells products to various parts of the world. While expanding our business, we are always committed to providing safe, high-quality, and environmentally friendly tire products to every user. Linglong Tire adheres to the concept of "quality first" and deeply implements the quality policy of "excellent quality, superior service, reputation oriented, and user satisfaction", integrating the concept and policy into all aspects of the Company's daily operations. We continuously promote product quality and safety through the following commitments:

1. Quality and safety awareness are deeply rooted in the ideology of every employee. The top management organization of Linglong Tire fully values the quality and safety of its products. Our quality and safety training is conducted at least once a year, covering every employee.

2. Committed to producing high-quality tire products that satisfy users. Guided by user needs, with user satisfaction as the direction, Linglong Tire adheres to the management philosophy of "full participation, full object, full process, and multiple methods". We firmly believe that quality is to meet customer needs and expectations, and fully comply with applicable laws, regulations, standards, and customer needs throughout the entire lifecycle of product design, development, manufacturing, sales, and service. Linglong Tire transforms customer requirements into product and service characteristics, reflected in product quality and services, and commits to ensuring continuous improvement of product safety and quality.

3. Establish a strict product quality inspection system. Linglong Tire has established an active product quality inspection and management mechanism, and

regularly conducts quality and safety inspections on its products. The Company regularly proactively identifies potential product quality and safety risks, and conducts preventive testing and management of products.

4. Strictly manage the quality and safety of supplier products. Linglong Tire establishes an annual supplier audit mechanism, which is executed by corresponding departments. Based on ISO: 9001 and other standards, combined with IATF 16949 standards, the Company conducts process audits, product audits, laboratory audits, environmental/energy/social responsibility audits on raw material suppliers and monitors the quality of supplier products. The Company has established a Supplier Management System and provides quality assurance training to suppliers at least once a year to ensure the product quality of Linglong Tire.

5. Control product production risks. Linglong Tire actively controls the risks that may affect the normal production of its products, in order to control and mitigate their impact on the Company and customer manufacturers. The Company regularly conducts risk assessments, proactively identifies potential risk factors that may have an impact on product production, and reduces and controls risks by improving system processes and continuous improvement measures.

6. Linglong Tire fully pays attention to product safety, actively takes effective measures to continuously reduce potential risks to employees, users, and the environment, and strives to become a brand enterprise with social responsibility and attention to employees and users.
